DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 29 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 29 and 31 recite that the unavailable output function is associated with a video game, but the specification shows that the transaction device has this output function, but the kiosk shows the video game better. It is unclear if "unavailable" is just different (bigger, better, ...).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting

Art Unit: 3627

directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 7, 8, 14-16, and 23-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Treyz et al.

Treyz et al. shows, figures 1 and 107, shopping assistance with handheld computing device (HCD) (transaction device), which may allow a user to obtain directory information for a shopping mall (locating and providing directions to store kiosk). Figure 1 shows that the HCD is "coupled" to the kiosk through the communications network at all times. Figure 107 shows an audio kiosk, which has an electronic output function from an audio database, which is not available on the HCD.

It should be noted that the above is just one possible interpretation of Treyz et al. to meet the limitations of the broadly recited claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 29-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Treyz et al. in view of Doerr et al.

Treyz et al., as shown above, shows all of the limitations of the claims except for specifying association with video games and facsimile communication.

Doerr et al. teaches a multimedia kiosk using an external fax modem (column 4, line 55) in order to communicate and teaches in background segments of video games in order to stimulate interest (column 1, lines 33-34).

Based on the teaching of Doerr et al., it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the system of Treyz et al. to incorporate an external fax modem in order to make use of a well known communication method and segments of video games in order to stimulate interest.

Response to Arguments

Applicant's arguments with respect to all claims have been considered but are moot in view of the new ground(s) of rejection.

The examiner considers the output of a database to be an electronic output function.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
